ABOUT ME

Building software. Delivering impact.

I'm a software engineer focused on building scalable web applications and digital products that combine strong architecture with practical business value.

Over the last 13+ years, I've worked on SaaS platforms, enterprise systems, e-commerce products, and public sector applications — from backend architecture and APIs to frontend development and technical leadership.

I enjoy designing maintainable systems, solving complex technical challenges, and helping teams deliver products that can grow long-term.

⚡ QUICK FACTS

13+ years

Of commercial experience.

Backend architecture

APIs and scalable systems.

Full-stack

End-to-end delivery.

Industry experience

Multiple domains and products.

Quality focused

Security, performance, clean code.

Experience

Professional background, education, and continuous learning.

Sanoma Learning

Nov 2025 – present · Remote · Belgium 🇧🇪

Senior PHP Software Engineer

Developed software for digital learning products used by teachers across the Belgian education market.

PHP 8.4 Laravel 12 Vue MySQL CloudSearch PHPUnit Docker K8S

Ingenious.build

Jan 2025 – Sep 2025 · Remote · US 🇺🇸

Engineering Team Leader / Senior Software Developer

Managed a 6-member engineering team, established and monitored KPIs, and delivered financial modules for a construction project management platform trusted by major construction companies worldwide.

PHP 8.4 Laravel 12 Vue PostgreSQL MongoDB PHPUnit Docker

TourRadar

Dec 2021 – Jan 2025 · Remote · Austria 🇦🇹

Senior PHP Software Engineer

Maintenance and development of tourradar.com and supporting back-office applications. Led PHP 8 upgrades, modular monolith roadmap, SEO and Redis-cached performance, and high-SLA CRM/CMS on a platform with 50,000+ tours across 160+ countries.

PHP 8 Symfony 6 Laravel 8 jQuery MySQL PostgreSQL Redis AthenaDB
PHPUnit Codeception Docker AWS SQS AWS Lambda

Łukasiewicz - Poznań Institute of Technology

Mar 2018 – Nov 2021 · On-site · Poland 🇵🇱

Team Leader / Fullstack Web Developer (Angular + PHP)

Development of Poland's largest business support portal, biznes.gov.pl. Team lead role with architecture spanning CQRS, modular monolith, Keycloak auth, MongoDB and Restfull-API.

PHP XML Laravel Angular MongoDB Elasticsearch PHPUnit Docker Jenkins

One Money Mail Limited

Dec 2016 – Feb 2018 · On-site · Poland 🇵🇱

PHP Developer

Maintenance and development of money transfer application (przekazypieniezne.com). AML modules, bank transfer import, and automated tests.

PHP 7 CakePHP 3 MySQL PHPUnit Codeception Docker

Freelancing

Jun 2013 – Nov 2016

Graphic designer / Web developer

Freelance web development projects and client work across PHP and front-end stacks.

PHP UI / UX MySQL

Education

Building a strong foundation in computer science.

Poznan University of Technology

 2015–2018

Master of Science (MSc)
in Computer Science

Specialization
Data Processing Systems

The Hipolit Cegielski State College of Higher Education in Gniezno

 2009–2013

Bachelor of Engineering (BEng)
in Computer Science

Specialization
Information Systems

Polytechnic School Complex in Września

 2006–2009

Technical Secondary School of Information Technology

Professional Title
IT Technician

Courses

Selected training and certifications.

Domain Driven Design

- Design and architecture patterns with effective techniques of Object Oriented Design for systems engineers
- Domain Driven Design - designing models of complex domains
- Strategic Domain Driven Design + Eventstorming

Clean Architecture & DDD

- Designing Next-Gen Architecture
- Legacy Fighter
- Domain Drivers
- Git course

PHPers Workshop

- Framework as an implementation detail

Agile & Scrum

- Real Scrum case-studies

Kubernetes

- Kubernetes course
